ULTRASOUND WELLNESS SCANS

MVVC now offers high-resolution ultrasound diagnostics to identify internal abnormalities before they become destructive or unmanageable. Early detection is key to longer life and lower healthcare costs!

This service costs only **\$125** and scans the entire abdominal cavity, which generates an image that can ease your mind or be analyzed further if there are concerns.

- Relatively fast, non-invasive and thorough
- Provides more detail than standard x-rays.
- Anesthesia often not needed!*
- Early detection of abnormalities
- Preventative peace of mind
- Add years to your pet's life
- Save on long-term costs
- Ask your vet about this preventative measure today!

* Most ultrasound procedures are brief-enough to not require anesthesia. For pets who are especially excited, light sedation may be necessary. An image and early analysis will be generated. No further diagnostics will be performed without your approval.
